SUMMARY

Computer Engineering graduate (2026) with hands-on Java full-stack experience across two internships and multiple shipped projects, including a Dockerized Spring Boot + React application designed, built, tested, and deployed to the cloud. Strong OOP foundation with practical experience developing validated, unit-tested REST APIs using Spring Boot and MySQL. Core strengths: backend development, clean API design, and end-to-end delivery.

SKILLS

Languages: Java, JavaScript, SQL

Backend: Spring Boot, JDBC, REST API Development, JUnit, Maven, Hibernate

Frontend: React, HTML5, CSS3

Databases: PostgreSQL, H2

Tools & Platforms: Git, GitHub, Docker, Render (Cloud Deployment), VS Code, Postman

PROJECTS

Abacus Academy Website - Inquiry & Admin Management Platform (Individual Project)

Tech Stack: Java, Spring Boot, JDBC, PostgreSQL, React, Chart.js, Docker, Render

- Built a full-stack platform for an abacus training academy- a React SPA (home, inquiry, admin; 17 components) with an interactive virtual abacus board, served from the same Spring Boot JAR as the REST API-a single deployment artifact with no CORS configuration.
- Developed the inquiry registration API with server-side validation, persisting to PostgreSQL via JdbcTemplate; covered authentication, repository, and validation layers with 9 JUnit tests (60%-line coverage).
- Secured admin endpoints with HTTP Basic auth and constant-time token verification in a Spring filter.
- Built an admin dashboard with debounced search, status tracking, live alerts, and Chart.js analytics.
- Dockerized (3-stage build); deployed free on Render + Neon PostgreSQL after migrating from MySQL (14 files changed, 9/9 tests green).

Live: success-abacus.onrender.com | 11 commits

Multi-Source News Synthesizer (Team Project)

Tech Stack: HTML5, CSS3, REST APIs

- Collaborated in a cross-functional team to build a news aggregation and summarization platform consolidating content from multiple external sources.
- Independently developed the frontend interface in HTML5/CSS3 and integrated 6+ external news-source REST APIs for real-time aggregation, handling response mapping and error states in the UI.

INTERNSHIPS

Java Full Stack Intern — QSpiders, Vashi, Navi Mumbai

December 2025 – June 2026

- Developed production-style full-stack applications across 7 months of mentor-led training in Java, Spring Boot, REST APIs, JDBC, and MySQL, applying MVC architecture and Git-based workflows throughout.

Java Developer Intern (Remote) — Sysslan IT Solutions, Yavatmal, Maharashtra

June 2026 – July 2026

- Completed assigned Java programming 12 modules for the company's application codebase, delivering code through Git-based collaboration in a fully remote 1-month engagement.

EDUCATION

Bachelor of Computer Engineering

2022 – 2026

MGM College of Engineering and Technology, Kamothe | CGPA: 7.74

Higher Secondary Certificate (HSC)

2020 – 2022

Pillai Mahatma Junior College, Panvel | 69.50%

CERTIFICATIONS & TRAINING

Emerging Technologies (SAP) | Cloud Bootcamp - GeeksforGeeks (GFG) | AI Outskill Bootcamp (NSDC)
